

List of poster presentations

- P-01 Side Reactions on Conductive Carbons in non-aqueous carbonate electrolytes**
Minglong He, Petr Novák, [Erik J. Berg](#)
- P-02 Cellulose-based carbon - a potential anode material for Na-ion battery**
[Krzysztof Kierzek](#), Jacek Machnikowski
- P-03 Nanostructured metal oxides on graphene as electrode materials for Li-ion batteries**
[Paulina Pótrołniczak](#), Krzysztof Wasiński, Mariusz Walkowiak
- P-04 Carbon from waste fruit peels as sulfur cathode component for high energy Li-S batteries**
[Paulina Pótrołniczak](#), Krzysztof Wasiński, Piotr Nowicki, Robert Pietrzak, Mariusz Walkowiak
- P-05 Electrochemical Deposition of Lead on Graphite – Linking Active Sites of Graphite Particles with the Incorporation into the Active Material in Lead-Acid Batteries**
[P. Bockowski](#), J. Settelein, B. Bozkaya, H. Lormann, G. Sextl
- P-06 Water Loss in Modern Lead-Acid Batteries – Linking Electrocatalytic Activity of Carbon Additives with their Physical and Chemical Properties**
[M. Rumpel](#), J. Settelein, H. Lormann, G. Sextl
- P-07 Carbon-based photoactive electrodes for electroluminescent device**
[Dominika Gastol](#), Konrad Kubasiewicz, Stefan Lis, Elzbieta Frackowiak
- P-08 Effect of surface modification on the capacitive properties of carbons in salt aqueous electrolytes**
[P. Babuchowska](#), F. Béguin
- P-09 Advanced RuO₂/PEDOT Architecture for Flexible and Transparent supercapacitors**
[John CF Zhang](#), Thomas M. Higgins, Jonathan N. Coleman and Valeria Nicolosi
- P-10 Nitrogen-Enriched Activated Carbons Prepared from a Polish Lignite for high power asymmetrical supercapacitors**
[K. Jurewicz](#), P. Nowicki, S. Bielawny, J. Kazmierczak-Razna, R. Pietrzak
- P-11 Electrochemical performances of Ionic Liquids based electrolytes associated with various nanoporous carbon materials for supercapacitor applications**
[Laure Dagousset](#), Grégory Pognon, Sébastien Jus, Giao T.M. Nguyen, Frédéric Vidal and Pierre-Henri Aubert

- P-12** How does the capacitor accept buffer solutions as electrolytes?
Anetta Płatek, Justyna Piwek, Elżbieta Frąckowiak
- P-13** Electrochemical Performance of Cerium Oxide Supported on Carbon Nanotubes
A.G.Gonçalves, M. Enterría, M.F.R.Pereira, J.I. Martins, J.L.Figueiredo
- P-14** High voltage aqueous supercapacitor
Jakub Menzel, Krzysztof Fic, Elżbieta Frackowiak
- P-15** Mesopore-rich Carbon as Supercapacitor Electrode Material with High Energy Density
Xuehang Wang, Haitao Zhou, Edel Sheridan, De Chen
- P-16** Effect of Low Temperature on the Redox Processes Occurring in AC/AC Electrochemical Capacitors with Various Salt Aqueous Electrolytes
Qamar Abbas, Patryk Przygocki, François Béguin
- P-17** Functionalized graphene-like materials as efficient solid catalysts for transesterification of rapeseed oil
Justina Gaidukevič, Paulina Rechnia, Aleksandra Miklaszewska, Jurgis Barkauskas, Mieczysław Kozłowski
- P-18** Influence of high voltage operation of electrochemical capacitors in aqueous electrolyte on carbon surface chemistry modification
Paula Ratajczak, François Béguin
- P-19** Influence of different conducting additives on the capacitor performance
Agata Śliwak, Stanisław Gryglewicz, Noel Díez, Grażyna Gryglewicz
- P-20** Would vinegar-based electrolytes be the sufficient aqueous medium for supercapacitors?
Justyna Piwek, Anetta Płatek, Elżbieta Frąckowiak
- P-21** Wood Based Microporous Carbons for Supercapacitors Electrodes
Aleksandrs Volperts, Galina Dobele, Aivars Zhurinsh, Darya Vervikishko, Evgeny Shkolnikov, Jurijs Ozolinsih
- P-22** Various Nanostructured Carbon Materials as the Electrode Components in Supercapacitors
Natalia Stryzhakova, Sergii Zelinskyi, Oleg Gozhenko, Dmytro Drobny, Yurii Maletin
- P-23** The carbon material modified with a low-temperature plasma iodine as electrodes of the electrochemical capacitor
L. Kolanowski, K. Lota, J. Tyczkowski, P. Makowski, I. Acznik, D. Peziak, G. Lota

- P-24 Fruit peels based electrode materials for supercapacitors**
Krzysztof Wasiński, Piotr Nowicki, Paulina Pótrolniczak, Mariusz Walkowiak, Robert Pietrzak
- P-25 Optimized activated carbon/poly(tetrafluoroethylene) composite electrode for supercapacitor application**
Adam Ślesiński, Elżbieta Frąckowiak, François Béguin
- P-26 Asymmetric supercapacitors based on biogenic Fe₂O₃ and activated carbon**
Antonia Stoyanova, Svetlana Veleva, Mladen Mladenov, Raicho Raicheff, Lozan Stoyanov, Elefteria Lefterova, Daniela Kovacheva
- P-27 Carbon materials as a support of electrode active material for electrochemical capacitors**
Katarzyna Lota, Ilona Acznik, Agnieszka Sierczynska, Grzegorz Lota
- P-28 Preparation and characterization of activated carbons and Ni(OH)₂ as electrode materials for asymmetric supercapacitors**
L. Stoyanov, L. Soserov, A. Stoyanova, M. Mladenov, R. Stoyanova, V. Koleva, E. Zhecheva, B. Tsyntsarski, N. Petrov, R. Raicheff
- P-29 Effect of carbons porous texture on the capacitive deionization of water**
A. Neubauer, P. Janicka, K. Fic and F. Béguin
- P-30 Systematic comparison of supercapacitive performance of graphene oxide and reduced graphene oxide**
Shahid Rasul, Amira Alazmi, Kevin Jaouen, and Pedro M. F. J. Costa
- P-31 Novel concept of hybrid carbon/carbon electrochemical capacitor**
Krzysztof Fic, Elżbieta Frąckowiak
- P-32 Cathode materials designed for pre-doping of the graphite anode in lithium ion capacitor**
Paweł Jeżowski, Olivier Crosnier, Thierry Brousse, François Béguin
- P-33 Example of possible applications of Lithium ion capacitor (Energycaps project sponsored by the European Union)**
F. Gauthy
- P-34 Collaborative project: Energycaps sponsored by the European Union**
F. Gauthy
- P-35 Fe₃O₄/rGO nanocomposite performance in hybrid electrochemical energy storage device**
Krzysztof Wasiński, Paulina Pótrolniczak, Grzegorz Lota, Mariusz Walkowiak

- P-36 Graphite and reduced graphite oxide as electrode materials for high-energy storage systems**
Ilona Acznik, Katarzyna Lota, Agnieszka Sierczyńska
- P-37 LIC formulation for wide temperature range application**
V. Khomenko, V. Barsukov, O. Chernysh, I. Makyeyeva, J. Menzel, S. Isikli and F. Gauthy
- P-38 Modification of Coal Tar Pitch used for Eco-Friendly Carbon & Graphite Manufacture**
Tomasz Lis, Kopal Katarzyna, Wilhelm Frohs, Janusz Tomala, Aneta Frączek-Szczypta, Stanisław Błażewicz
- P-39 Mechanism of Potassium Catalyzing Carbon Oxidation: from Oxygen Transfer to Electron Transfer**
Yexin Zhang, Qian Li, Zhaoliang Zhang, Jian Zhang
- P-40 An Electrostatically Stable Polyviologen-Reduced Graphene Oxide Composite Films for Future Electrochromic Displays**
Bhushan Gadgil, Pia Damlin and Carita Kvarnström
- P-41 Development of 3 D-graphene for Biofuel Cells**
Michal Wagner, Jens Ulstrup and Jingdong Zhang
- P-42 Electrochemical synthesis of graphite oxide in perchloric acid**
Bartosz Gurzeda, Patryk Florczak, Piotr Krawczyk, Stefan Jurga
- P-43 Application of thermal treated activated carbon as a modifier of carbon paste electrodes**
Katarzyna Skrzypczyńska, Krzysztof Kuśmierk, Andrzej Świątkowski, Stanisław Błażewicz
- P-44 Multiscale quantification of the functional groups of graphite oxide by solid state NMR and XPS**
Maïmonatou Mar, Nicolas Batisse, Marc Dubois, Katia Guérin, Laura Fernandez-Garcia, Raquel Verdejo, M.A. Lopez-Manchado, Rosa Menéndez, Bernard Simon, Patrick Bernard
- P-45 Dual C-F bonding in fluorinated exfoliated graphite**
Maïmonatou Mar, Nicolas Batisse, Marc Dubois, Katia Guérin, Bernard Simon, Patrick Bernard
- P-46 Relation between morphology and conductivity of carbon-based polymer composites: theoretical and experimental study**
J. Vrana, M. Kroupa, P. Mazur, J. Dundalek, J. Pociđič, J. Kosek

- P-47 Carbon Nanofibers for Medical Applications**
Ewa Stodolak-Zych, Piotr Szatkowski, Elżbieta Menaszek, [Marta Błażewicz](#)
- P-48 Self-healing polyurethane - based composites containing carbon nanotubes and carbon fibres**
Piotr Szatkowski, Kinga Pielichowska, [Stanisław Błażewicz](#)
- P-49 Carbon Nanotubes and Graphene Hybrid Coatings for Medical Application**
[Aneta Fraczek-Szczypta](#), Alicja Wedel, Justyna Grzonka, Filip Ciepiela, Sławomir Zimowski
- P-50 Metal-free oxygen/nitrogen co-doped carbon xerogels as catalysts for the oxidative dehydrogenation of isobutene**
[Anna Malaika](#), O.S.G.P. Soares, K. Morawa-Eblagon, M.F.R. Pereira, J.L. Figueiredo
- P-51 Comparative study of three heteropolyacid supported on carbon materials as catalysts for ethylene production from bioethanol**
M. Almohalla, I.Rodríguez-Ramos, [A. Guerrero Ruiz](#)
- P-52 Autoclaved oxidation treatment of carbon nanotubes to enhance the acidity**
[Bo-Lun Wang](#), Guodong Wen, Dangsheng Su
- P-53 Removal of phenol from water with the use of modified activated carbon catalysts**
[Paulina Rechnia](#), Olívia S.G.P Soares, Manuel F.R. Pereira, Mieczysław Kozłowski, José L. Figueiredo
- P-54 Highly selective and stable ethylbenzene dehydrogenation to styrene over ultradispersed nanodiamonds under oxygen-lean conditions**
[Jiangyong Diao](#), Hongyang Liu, Rui Huang, Zhenbao Feng, Dangsheng Su
- P-55 A metal-free catalytic reaction pathway for oxidation of phenols**
[Yangming Lin](#), Dang Sheng Su
- P-56 Preparation of Carbon Coated Magnetic Iron Based Nanomaterials as Efficient Catalyst for Transfer Hydrogenation of Nitroarenes**
[Shuchang Wu](#), Sylvia Reiche, Robert Schlögl
- P-57 Aqueous Phase Hydrogenation of Levulinic Acid over Carbon Supported Ru Catalysts**
V. Song, M.C. Lozano-Martín, B. Backiller-Baeza, A. Guerrero-Ruiz, [I. Rodríguez-Ramos](#)
- P-58 Hypothetic Role of Selected Constituents of Wood and Chitin During Carbonization of the Biomaterials**
[Anna Ilnicka](#), Jerzy P. Łukaszewicz

- P-59 Preparation of Activated Carbons from Industry Waste Materials Using Microwave Radiation**
Justyna Kazmierczak-Razna, Marta Masztalerz, Żaneta Budzicka, Piotr Nowicki, Robert Pietrzak
- P-60 Comparison of Physicochemical and Sorption Properties of Activated Carbons Obtained by Microwave and Conventional Heating of Biomass**
Justyna Kazmierczak-Razna, Piotr Nowicki, Robert Pietrzak
- P-61 Preparation of activated carbons from pitch-polymer compositions in the process of activation with carbonates**
Grzegorz Makomaski, Janusz Zielinski
- P-62 Activated carbons from waste whistle milk for organic compounds removal from water**
Bartosz Grudziński, Ewa Lorenc-Grabowska, Piotr Rutkowski
- P-63 Kinetics and equilibrium study of chlorophenol adsorption on modified activated carbons from non-aqueous solutions**
Ewa Lorenc-Grabowska
- P-64 Electric Conductivity of The Granular Carbons Studied by Dielectric Method**
Szymon Łoś, Wojciech Kempieński, Zbigniew Trybuła, Laurent Duclaux
- P-65 Magnetic Properties of the Porous Modified Graphenic Materials**
Roman Strzelczyk, Łukasz Majchrzycki, Maria Augustyniak-Jabłokow, Mariusz Maćkowiak
- P-66 Potential of Ionic Liquids in Tailoring the Properties of Carbon Aerogels**
Krisztina László, Balázs Nagy, Muriel Józó
- P-67 Adsorption kinetics of 4-chlorophenol from aqueous solutions on mixed adsorbents: activated carbon and carbon nanotubes**
Katarzyna Skrzypczyńska, Krzysztof Kusmierek, Andrzej Świętkowski, Władysław Kamiński
- P-68 Removal of a cationic Dye from Solution by Clay-Carbon Adsorbent**
Chafika MEZITI, Benoît CAGNON, Alain PINEAU, Abdelhamid BOUKERROUI
- P-69 Studies of adsorption and reduction of hexavalent chromium on activated carbon**
Lucía Alvarado, Ramón Espinosa, Martín Caudillo

- P-70 Adsorption kinetics of a nine contaminants onto microporous and microporous/mesoporous activated carbon cloths**
S. Masson, L. Reinert, S. Guittonneau, L. Duclaux, M. Gineys, F. Béguin, N. Cohaut, S. Delpeux
- P-71 Depolluting carbon sponges for absorption of solvents or hydrocarbons**
A. Stolz, L. Reinert, S. Le Floch, S. Ramos-Canut, Y. Soneda, P. Chaudet, D. Baillis-Doermann, L. Duclaux, A. San-Miguel
- P-72 Carbonaceous adsorbents for mercury adsorption from flue gases**
Jakub Szczurowski, Leszek Czepirski, Colin E. Snape
- P-73 Carbon Dioxide Capture by Ordered Mesoporous Carbons. The Comparative Effects of Porous Texture and Surface Chemistry**
A.Sánchez-Sánchez, F. Suárez-García, A. Martínez-Alonso, J. M. D. Tascón
- P-74 Hydrogen Confined and Restrained in Overcrowded Carbon Nanopores**
Cristian I Contescu, Nidia C Gallego, Eugene Mamontov, Yuri B Melnichenko, Lilin He, Alexander I Kolesnikov, Raina J Olsen, James R Morris
- P-75 Chars from Pyrolysis or Gasification of Residual Biomasses are Used for Syngas Cleaning**
K. S. Goh, M. Hervy, A. Villot, C. Gérente, and L. Le Coq
- P-76 Synthesis of n-doped graphene from biomass sources for CO₂ adsorption**
Leila Ekhlesi, Habibollah Younesi, Alimorad Rashidi
- P-77 Preparation of nanoporous carbon from walnut shell to capture of gasoline vapors in the automotive industry**
Azam Jalali, Alimorad Rashidi, Manouchehr Nikazar, Kobra Rahbar
- P-78 Gas hydrate formation in the confined nanospace of carbon materials**
J. Silvestre-Albero, M.E. Casco, M. Martinez-Escandell, E.V. Ramos-Fernández, F. Rodríguez-Reinoso
- P-79 Pt/nanocarbon composite material for efficient hydrogen storage**
Mirosława Pawlyta, Barbara Liszka
